STEPPING THE SUMMIT

*"I love the school from bottom of my heart
As if mother to her kid."*

Generally we develop some relation with some short span, but my healthy relation with this school is for last 12 years. I have become the part and participle of my school. I have been affectionate with every person. I have changed by so many ways, like intellectually, psychologically and philosophically.

Big tree supports small plants underneath. In the same way we feel in this atmosphere. Trustees themselves pay attention individually. Everyone should do their level best and complete the work with correctly is their main aim. Our trustee behave affectionately. Sometimes they treated us strictly & praise us. They share our joys & sorrows. Even our trustee Smt. Smitaji Y. Chavan is one step ahead to the founder Late Yashwantrao B. Chavan. She is a lighthouse to us.

I still remember the day, 6th December 1996, when I took first step in the school. I was only 'Certified B.A.B.Ed.' teacher. But Madam showed great faith in me and appointed me as a teacher to primary school.

Today I am a good teacher because of sir's affections and madam's motherly love and awesome fear.

Madam had overcome to my ability and talent, and decided to take me at the secondary level but I was not willing to leave the primary teachers because they have helped me in my difficulties.

I have performed my duties honestly time to time. It helped me lot to become a successful teacher. My personality is groomed here.

Though my economical background was not so good. I could get many opportunities to learn many arts like dance, mono acting. While developing students hidden talent teacher also get opportunity to develop himself, this is only applicable in Shramik Vidyalaya. The school has given me ample opportunities to take part in many competitions. I have got many awards in the district level mono acting competition; this success gives more joy to Madam & Sir than me.

Allround development of the school and students is our destination. Big family needs big house, like this, our swelling school needs a big and specious school building. I Pray to the Almighty God to fulfill the dream of new and spacious school building.
